

VETERINARY ANESTHESIA RECORD AND TELEMONITORING SOFTWARE

Created by veterinary
anesthesiologists for accuracy,
efficiency, and peace of mind

somnivet.com

Somnivet enables complete anesthesia records with live telemonitoring and historical case review, helping you manage multiple patients from anywhere while reducing paperwork and errors.

Vitals Synced from Monitor

Effortless monitoring, more time for patient care

Live remote access

Review every waveform live or from previous cases

Smart Drug Calculation

Streamlined dosing with built-in alerts, saving time and reducing errors

Easy setup

Quick, wireless installation for stress-free monitoring

The screenshot shows the Somnivet software interface. On the left is a sidebar with navigation options like 'Dashboard', 'Patients', 'Procedures', and 'Reports'. The main area displays a patient list with columns for Patient Name, Procedure, and Status. A patient named 'John Doe' is highlighted. To the right, a detailed view of a patient's vitals and waveforms is shown, including ECG, SpO2, and other vital signs.

Patient Name	Procedure	Status	Start Anesthesia	End Case	Post-Case
Billy Thompson (Carina, 1000 kg) (000001)	TRUL	Awake	<button>Start Anesthesia</button>	<button>End Case</button>	<button>Post-Case</button>
Charlie Doherty (Carina, 1000 kg) (000002)	TRUL	Awake	<button>Start Anesthesia</button>	<button>End Case</button>	<button>Post-Case</button>
Emily Nguyen (Carina, 1000 kg) (000003)	TRUL	Awake	<button>Start Anesthesia</button>	<button>End Case</button>	<button>Post-Case</button>
John Doe (Carina, 1000 kg) (000004)	TRUL	Awake	<button>Start Anesthesia</button>	<button>End Case</button>	<button>Post-Case</button>
Laura Fernandez (Carina, 1000 kg) (000005)	TRUL	Awake	<button>Start Anesthesia</button>	<button>End Case</button>	<button>Post-Case</button>
